Turtle Habitat

RESTORATION TECHNIQUE: Reptile/Amphibian Habitat
HABITAT TYPE: Sheltered Embayments and Coastal Wetlands

- Extensive emergent vegetation
- Good Riparian Buffers
- South facing sandy embankments suitable for turtle nesting and basking
- Basking logs and rocks

Targets:
- Improve emergent vegetation
- Improve submergent vegetation
- Increase high quality riparian vegetation
- Increase areas of primary production
- Improve forage for aquatic and terrestrial species
- Add structural elements to improve near shore habitats
